

I am writing to request that new LPFM stations NOT be allowed to take priority over current FM translator service. There is great local value to my community from FM station k-love. Many small communities do not have the resources to offer this kind and quality of programming locally. K-love's programming is in the public interest because it is one of the few stations broadcasting that offers encouraging music and messages throughout the day, as well as phone numbers for people with problems to get help. It is a rare alternative to mass market music and messages that feature violence and promiscuity. Please do not vote to give LPFM stations priority.
THank you.
